Languages

Arabic

English

French

Soft Skills

self-motivation

Collaboration

Adaptability

Hard Skills

Programming : C, C++, C#,
Python, Java, TypeScript, Dart

DBMS : Oracle / SQL Server

OS : Linux, Windows

Frameworks : Django, Angular,
.Net, SpringBoot, React, Flutter,
NestJS

Version Control: Gitlab

Project Management : Jira,
ClickUp

Certifications

**Software Engineering: Modeling
Software Systems using UML**

Virtual Networks in Azure

**Java Programming : Solving
problems with Software**

React Native

Interests

Basketball

Martial arts

Reading

Education

Engineering Degree in Computer Science

From 2020 to 2025 Moroccan School of Engineering Sciences Casablanca, Morocco

International Baccalaureate (French Option – Physical Sciences)

From 2014 to 2020 Oum El Koura Casablanca, Morocco

Work experience

Full-Stack Developer

Since Sept. 2025 KEENOPS

Refactoring of the YallaFarha gift management platform NestJS / Flutter

- Restructured the NestJS backend with a modular, layered architecture
- Implemented guards, interceptors, pipes and exception filters for security, validation and centralized error handling
- Introduced custom decorators, middleware and centralized config management for cleaner and more maintainable code
- Built a reusable Flutter widget library with global styles to ensure UI consistency and eliminate hardcoded values across the application

Internships

Front-End Developer

From Jan. 2025 to Aug. 2025 KEENOPS

Development of an event-based gift management application using Flutter

- Object-oriented analysis and design (UML)
- Development of web and mobile applications using Flutter
- Integration of REST APIs and endpoint testing using Postman
- Automation of deployment to the App Store and Google Play using Fastlane

Development of an employment support platform using Angular

- Writing detailed functional specifications for each interface
- Development of admin and client interfaces using Angular and PrimeNG
- Project and task management using ClickUp, with source code managed on GitLab

Front-End Developer

From Aug. 2024 to Oct. 2024 Equatorial Coca-Cola Bottling Company

Development of a mobile CDE management application using Flutter

- Object-oriented analysis and design (UML)
- Design and implementation of the application's user interfaces
- Development, execution, and deployment of the application

Full-Stack Developer

From July 2023 to Sept. 2023 MUS Building

Development of a stock management application using C++

- Object-oriented analysis and design (UML)
- Database setup and management
- Design and development of user interfaces
- Development, testing, and deployment of the application

Academic Projects

SalHuman

From Mar. 2024 to Jun. 2024

Web application for human resources and payroll management Spring Boot / ReactJS

MySyndicat

From Jan. 2024 to Mar. 2024

Mobile application for managing condominium syndicates Kotlin

Medical Center

From Nov. 2023 to Jan. 2024

Web application for medical center management Django / ReactJS
